Election/Restriction

1. Claims 1-20 are presented for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6 and 14-20, drawn to a method and system for logging into a remote computer by way of a management processor to initiate a remote console session using a default and a none-default remote consol session, classified in class 709, subclass 224.
 - II. Claims 7-13, drawn to a system management processor for switching to a software based remote console session from the hardware remote console session, classified in class 709, subclass 218.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I, II are related as subcombinations disclosed as usable together in a combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as to a method and system for logging into a remote computer by way of a management processor to initiate a remote console session using a default and a none-default remote consol session, classified in a *different Class/Subclass*. Invention II has separate utility such as a system management processor for switching to a software based remote console session from the hardware remote console session, classified in a *different Class/Subclass*.

4. The inventions are distinct, each from the other, because of the following reasons:

(a) These inventions have acquired a separate status in the art as shown by their different classifications.

(b) The search required for each Group is different and not co-extensive for examination purposes.

For example, the searches for the three inventions would not be co-extensive because these Groups would require different searches on PTO's classification class and subclass as following:

the Group I search (claims 1-6 and 14-20) would require use of search **class 709, subclass 224** (not require for the inventions II).

the Group II search (claims 7-13) would require use of search **class 709, subclass 218** (not require for the inventions I).

For the reasons given above restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mark Scott on 9/12/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A shortened statutory period for reply is set to expire THIRTY DAYS from the mailing date of this communication. Failure to respond within the period for response will cause the application to become abandoned (35 U.S. C. Sect. 133). Extensions of time may be obtained under the provisions of 37 CFR 1.136(A).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305 -9600.
